24 participants

INTENDED AUDIENCE

Junior doctors – residents and recently specialized doctors.

Senior medical students who take interest in emergency medicine.

PRICE

300€ per participant

LANGUAGE

Portuguese (an English course will be performed with a minimum of 4 students)

THEMES & CONTENT

ACLS builds on the foundation of Basic Life Support (BLS), emphasizing the importance of continuous, high-quality CPR.

The hands-on instruction and simulated cases in this advanced course are designed to help enhance their skills in the recognition and intervention of cardiopulmonary arrest immediate post-cardiac arrest, acute arrhythmia, stroke, and acute coronary syndromes.

GOALS

- > Apply the BLS, primary, and secondary assessments sequence for a systematic evaluation of adult patients.

Perform prompt and high-quality BLS, including prioritizing early chest compressions and integrating early automated external defibrillator (AED) use.

- > Recognize and perform early management of respiratory arrest.

- > Recognize and perform early management of bradyarrhythmias and tachyarrhythmias that may result in cardiac arrest.

- > Recognize and perform early management of cardiac arrest until termination of resuscitation or transfer of care, including immediate post-cardiac arrest care.

- > Model effective communication as a member or leader of a high-performance team.

- > Recognize the impact of team dynamics on overall team performance.

- > Discuss how the use of a rapid response team or medical emergency team may improve patient outcomes.
