THEMES & CONTENT

- > Initial assessment and management;
- > Airway and ventilatory management;
- > Abdominal and pelvic shock;
- > Thoracic trauma;
- > Trauma – head, spine, musculoskeletal;
- > Spinal immobilization;
- > Secondary survey, head-to-toe exam, patient transfer;
- > Spinal assessment/X-rays;
- > Primary survey X-rays;
- > Cricothyroidotomy, chest decompression, pericardiocentesis;
- > Application of pelvic binder.

GOALS

- > Demonstrate the concepts and principles of primary and secondary patient assessments.
- > Establish management priorities in a trauma situation.
- > Initiate primary and secondary management necessary within the golden hour for the emergency management of acute life-threatening conditions.
- > In a given simulated clinical and surgical skills practicum, demonstrate a range of skills, which are often required in the initial assessment and treatment of patients with multiple injuries.
