English; Portuguese optional if all participants agree

THEMES & CONTENT

This workshop aims at obtaining knowledge concerning the fundamentals of image production in ultrasonography, practical and technical notions of this technique and its applications in the emergency context.

GOALS

- > Know the principles behind ultrasound image production.
- > Distinguish different types of images and evaluate major intra-abdominal structures
- > Recognize (with clinical exercises) the main indications for emergency ultrasound and the information which it can provide, as well as the limitations of this technique.
- > Guide the performance of an ultrasound exam.
